

Senior backend engineer with 10+ years building game server systems at scale. I focus on solving problems — performance bottlenecks, deployment automation, system security — not memorizing frameworks. My workflow is AI-first: I use Claude Code as my primary development tool, supplemented by Codex, for architecture design, code review, and rapid development across any tech stack.

Core Competencies

Game Server Architecture

Designed multi-server systems (Gate/Lobby/Game) and built reusable game frameworks that significantly cut development cycles for new titles.

Lua/Skynet, Golang, TCP/WebSocket, gRPC

Database & Cache Optimization

Diagnosed full-collection scans on ~2.7M records/day and designed compound indexes. Restructured Redis key architecture to eliminate excessive SCAN operations.

MongoDB, Redis, MySQL, PostgreSQL

DevOps & CI/CD

Automated Docker image builds to Harbor registry, designed Helm chart deployments on Kubernetes, set up GitLab Runners and remote SSH deployments.

Kubernetes, Docker, Helm, GitLab CI/CD

Security & Data Integrity

Investigated Redis data tampering incidents, traced attack vectors to vendor directory vulnerabilities, implemented AES encryption + checksum verification.

Employment History

- Senior Server Engineer** · Tyche Tech Co, Ltd Jan. 2021 — Present
3 game server projects (Lua/Skynet, Golang). MongoDB optimization on 2.7M records/day. Redis architecture redesign. Security incident investigation & AES encryption. CI/CD pipeline with Docker/Harbor/Helm.
- Senior Server Engineer** · Terpro Mobile Co, Ltd Jun. 2019 — Dec. 2020
Built reusable slot game framework (FreeGame, Lightning, PickGame). Kubernetes/Helm deployment.
- Senior Backend Engineer** · WistronITS Corp. Stationed: Taiwan Mobile Sep. 2016 — May 2019
Led 2 engineers. Built 5 micro-services (OpenId, Product, Payment, Stock, Kafka). Jenkins/Nexus CI toolchain.
- Software Engineer** · Kangda Info Corp. Jul. 2015 — Aug. 2016
- Software Engineer** · BenQ Corp. Nov. 2013 — Feb. 2015
- Software Engineer** · Fashion Intelligence Co, Ltd (Open-Life) Nov. 2011 — Oct. 2013

Piecework Project

- PGS Game Server (solo)** Dec. 2022 — Apr. 2023
Designed & developed 3 games and a dashboard website as a solo developer / Game Server (Golang, TCP/WebSocket, gRPC) / API Server (Golang, Gin, gRPC) / Web Dashboard (Vue.js, Nuxt3, TailwindCSS)
- Yapro car tax refund management (2 members)** Jan. 2021 — Mar. 2021
Created RestAPI Server (Golang) / Created AWS Services, use ECS, RDS
- Muxin CarePro CMS (5 members)** Nov. 2013 — Mar. 2015
Created Server, Linode account, base on CentOS, Apache, PHP, Postgres SQL

Education

Bachelor of Electrical Engineering — National Kaohsiung University of Science and Technology(NKUST), Taiwan Sep. 2006 — Jun 2010
